

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

1.-41. (Cancelled)

42. (Currently Amended) A camera comprising:

a camera body;

a memory slot provided in the camera body for detachably receiving a first
~~memory, detachably installed inside the camera body,~~ capable of storing image
information corresponding to a plurality of photographic frames;

a second memory, fixedly installed inside the camera body, capable of storing
image information corresponding to a plurality of photographic frames;

~~an image processor for processing image information;~~

a detector for detecting whether the first memory is received in the memory slot;

a reproduction device, ~~installed inside~~ provided in the camera body, to selectively
receive and reproduce image information recorded on one of the first memory and the
second memory; and

~~a changer for selectively changing between a first condition, in which image
information on the first memory is outputted to the image processor, and a second
condition, in which image information on the second memory is outputted to the image
processor, the processed image data being outputted to the reproduction device~~

a controller for controlling the reproduction device so that image information in the
second memory is reproduced by the reproduction device when the detector detects that
the first memory is not attached, while image information in the first memory is
preferentially reproduced by the reproduction device when the detector detects that the
first memory is attached.

43. (Cancelled)

44. (Previously Presented) A camera according to claim 42, which further comprises a finder for finding a camera subject.

45. (Cancelled)

46. (Previously Presented) A camera according to claim 42, which further comprises a button for advancing image information to be reproduced by the reproduction device among the plurality of photographic frames.

47.-55. (Cancelled)

56. (New) A camera according to claim 42, which further comprises a button for advancing image information to be reproduced by the reproduction device among the plurality of photographic frames stored in the second memory when the first memory is not attached, and for advancing image information to be reproduced by the reproduction device among the plurality of photographic frames stored in the first memory when the first memory is attached.

57. (New) A camera according to claim 42, wherein said first memory is an IC card.
